

Flexi PiCK AC

- Unique product layer picking system
- Low capital investment cost
- Pick rates of over 1000 cases per hour
- Creates FMCG marketing opportunities
- System design allows any number of product lines to be layer picked
- Developed to handle fragile and glass packaged products
- Pallet boards can be inserted between product layers as required
- Eliminates case picking manual handling issues
- Provides stable uniformly stacked multi-product loads.

Powerful picking solutions
from research and innovation

Eliminates manual handling issues. Whole product layers and wooden pallets can be stacked into stable, uniform pallet loads ready for dispatch. Over 1,000 cases per hour, per unit can be picked.

TRUE RADIUS™ CHASSIS

The compact chassis eliminates damage. True Radius™ design with no wheel arches.

INTEGRATED HYDRAULIC ARMS

Smooth regulated hydraulic operation with soft rubber grip pads. Developed for fragile and glass packaging.

RAPID LOAD TRANSFER

Narrow FWD truck chassis and integrated picking arms allow fast, safe transfer of picked layers to assembly station.

“CLEAR VISION” MAST

Operators have excellent forward visibility thanks to the HiVIS free lift mast, with its twin side mounted lift cylinders. Safe forward and lateral product layer pick up and set down.

CUSHION TYRES

Cushion tyres allow operation on standard warehouse floors, with low point loadings.

EASY BATTERY CHANGE

Low rear lift off or roll off for fast changeovers. Good access for battery topping. No motors hidden underneath.

FLEXI NARROW AISLE
