

ECO AC

Narrow Aisle Ltd

Environmentally sensitive.
Cost effective.
Low carbon footprint.

A cost effective Flexi solution

Flexi Eco AC is our remanufactured product that reuses over 30% of all raw materials at the end of a truck's economic life, providing significant cost savings compared to an equivalent new truck.

Save money – save resources

The integrity and high quality of the original design enables Flexi to be remanufactured under our 'Eco AC' programme and offer cost savings of up to 30% compared to a new truck, whilst saving the carbon required to make valuable structural components and castings.

Environmentally sensitive

All steel and iron components are recovered, upgraded and repainted. Additionally, all other components are removed and recycled in an environmentally sensitive manner.

Looks brand new – performs brand new

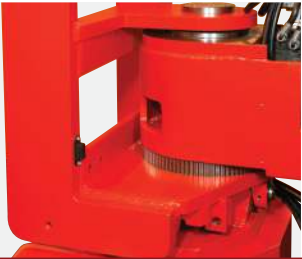

Each Flexi Eco is built to the latest technical specification and includes all new motive and hydraulic components. A 'state of art' Zapi control system is installed and on completion the truck looks and performs as the latest new Flexi model would - guaranteed. Identical warranty to brand new product.

ECO AC

**Environmentally sensitive.
Cost effective.
Low carbon footprint.**

Low Carbon

All cast iron and steel components are removed, inspected, upgraded and repainted saving over 30% of raw material costs.

Environmentally Sensitive

All components that are removed and replaced are recycled in an environmentally sensitive manner.

Treaded Cushion Tyres

New treaded elastic rubber tyres allow operation on standard warehouse floors or outside yards.

Zapi AC Technology

A 'state of the art' Zapi control system and motors are installed. Low energy consumption and long service life.

Hydraulics Replaced

All motive and hydraulic components replaced with latest version. All lift components are latest specification.

High Quality New Battery

Complete new super DIN battery and new tank fab installed. Low energy usage charger supplied.
